

## A Appendix

### A.1 Detailed Hyperparameter Configurations

**Table 1: Detailed Hyperparameter Configurations for ViTSAD.**  $L$  denotes the window size,  $\tau$  the step size, and  $\ell$  the sub-window length. The thresholds  $\delta_1$  and  $\delta_2$  correspond to the residual augmentation thresholds for the six types of relationship matrices.

Dataset	$L$	$\tau$	$\ell$	Group O Matrices						Group C Matrices					
				$\overline{G}_O^o$		$\overline{G}_O^d$		$\overline{G}_O^v$		$\overline{G}_C^o$		$\overline{G}_C^d$		$\overline{G}_C^v$	
				$\delta_1$	$\delta_2$	$\delta_1$	$\delta_2$	$\delta_1$	$\delta_2$	$\delta_1$	$\delta_2$	$\delta_1$	$\delta_2$	$\delta_1$	$\delta_2$
